

The Butterflies/Ha Papareem Week of August 22 - 26, 2011

Math:

The children are counting the number of boys and girls in our class. We created a mathematical equation as we added the number of boys to the number of girls in our class. The children chose favorite animals and we then voted. We added up the number of votes each animal received and we are now: The Butterflies!

Literacy:

We read books such as "D.W.'s Guide To Preschool," "Zoo Babies," and "Chicks And Salsa." After choosing our class name, we then wrote our first class story about what we know about butterflies.

Science:

Brandon was our meteorologist for the week. He told us there was a hurricane coming and that we might lose electricity.

Gross Motor:

The children rode bicycles around the bicycle path. The children walked up the stairs to the slide and went down the slide properly.

Fine Motor:

The children used eye-hand coordination to decorate their kippot with paint. The children also used eye-hand coordination when making their Shabbat placemats. We practice writing our names on our green sheets each morning and our art work.

Social/Self Help:

The children are learning the routines which they follow when they enter the classroom. The children are practicing using the rules which we formulated as a class.

Judaic:

We say the blessings before snack and lunch. We say the blessing for after lunch. We sing Hatikvah everyday. We went to the Wasley Chapel on Friday for Shabbat.

Reminders: Please label all morning and afternoon snacks!

Shabbat Shalom
